

Parental Support – How can you support your child with numeracy?

Most parents will encourage their child to take maths seriously and try and help in the best way they can. However, not everyone has a natural talent for maths and along with the different methods that are being used today it may be difficult at times to help your child with their work at home.

Even if maths is not your strongest subject there are still ways in which you can support your child. Family maths toolkit gives plenty of information and advice on supporting your child at home with their maths work. The website contains information on the following topics:

- Talking about maths
- Talking to your child about school
- Helping with maths homework
- How the National Curriculum works
- Current teaching methods
- Improving your own maths
